# Enabling auto-captions on your Panopto folders

Looking for a quicker way to add auto-captions to your videos? Panopto has a new folder setting which enables you to have auto-captions added, automatically, to your videos. The setting can be applied to any folder within Panopto.

## To automatically add auto-captioning to new videos:

1. Navigate to the folder you want to add the automatic captions to. Once opened, in the top-right hand side of the screen, click on the **settings gear** icon.

2. On the left-hand side of the screen, select "**Settings**".

3. Navigate to the Captions section and select "**Automatic Machine Captions**".

Now, any new videos that are uploaded or moved into this folder will be Closed Captioned automatically using Panopto's machine-generated captions. Note that pre-existing videos in this folder will not be automatically captioned.

Remember to verify and correct Panopto's automatic captions before sharing videos with your students.
